

GeoWash

LIQUID DISHWASHING COMPOUND FOR AUTOMATIC MACHINES

DESCRIPTION

GeoWash is a strongly alkaline chlorinated liquid detergent, incorporating caustic alkali, a high level of sequestrants and corrosion inhibitors.

APPLICATIONS (Usage Areas)

GeoWash is designed for use in all makes of commercial and industrial dish washing machines.

Geowash must only be used with the Geochem dosing equipment in combination with the Geodry rinse additive.

DIRECTIONS FOR USE

Geowash is normally dosed at a level of 500-1000ml per 100 litres of water.

The Geochem Technical representative will set the dosing equipment controls allowing optimum efficiency and economy.

Geowash performs ideally at a temperature above 50°C, but will also clean satisfactorily at lower temperatures.

PRECAUTIONS

GeoWash contains strong alkalis and care should be taken to prevent contact of the concentration with skin or eyes.

- Wear impervious rubber gloves and safety goggles when using
- Do not use with other cleaners and acids
- Do not use with other cleaners and acids
- Keep out of the reach of children

EMERGENCY TREATMENT

Skin contact: Flush immediately with soap and water, wash contaminated clothing before reuse. If irritation develops, seek medical advice.

Eye contact: Rinse immediately with plenty of water for 15 minutes with eyelids held wide open. Seek medical advice.

Inhalation: Move person to fresh air and seek medical advice.

Ingestion: Do not induce vomiting. Do not attempt to neutralise. Seek immediate medical attention.

STORAGE

Store in original container undercover. Keep container tightly closed when not in use. Keep away from the reach of children. Once dispensed use immediately.
